

Store & Forward Controller

Centeron Wireless Tank Monitoring System

The Store & Forward Controller captures all data reported by a Centeron Monitor and uploads the information via standard telephone service to the Centeron Data Center for easy Internet access. It also contacts the Data Center immediately whenever a monitor transmission is manually initiated so you get the very latest level information when you need it.

- Reports all monitor readings
- Stores up to 100 monitor data points
- Automatically uploads monitor data to the Centeron Data Center when its buffer is full
- Immediately reports to the data center whenever a monitor transmission is manually initiated
- Models for 4 or 20 monitors

Specifications:

- 900MHz Direct Sequence Spread Spectrum Radio Receiver
- Radio range: 1-mile line of sight, 500 feet obstructed
- Globally compliant modem
- Environment: Indoors
- Temperature range: 0° C to 60° C
- Two RJ11 phone jacks
- RS 232 serial port
- Power: 110 VAC
- FCC Part 15 and Part 68 compliant
- UL 60950 and CS03 compliant

The Centeron System

We start with an easy to install monitor. It's wireless, so no special know-how or tools are needed. It's powerful, too. Our DSSS radio technology is far superior to the narrow bandwidth radios found in other wireless systems. That means you receive your data even in the harshest environments.

The monitor sends the tank level data to the controller. The

controller collects the data then sends it to the Centeron Data Center. From there, you can retrieve your info anytime, wherever you are.

Just think about what that information can mean to your business. An up-to-date, accurate account of tank level allows you to deliver your product when it needs to be delivered. Centeron puts you in control so you can manage your business better.

Call 1-865-981-3118 and speak directly to a Robertshaw applications engineer.

Exceptional DSSS radio technology is superior to narrow band systems, resulting in more reliable communications. So advanced, it's already the recipient of 12 patents, with additional pending.
